MUHAMMED K B

Summary

As a recent graduate with a degree in Bachelor of Computer Applications (BCA), I have gained comprehensive knowledge in data structures and algorithms, complementing my expertise in languages such as C, C++, Java, and PHP, along with proficiency in object-oriented programming. This educational background has refined my problem-solving and collaboration skills, preparing me effectively for a software engineering role. I am enthusiastic about participating in innovative projects and contributing to the growth of a dynamic team.

Education

○ **2021 - 2024**
MES College Marampally
Bachelor of Computer Applications

○ **2019 - 2021**
MGM HSS Kuruppampady
Plus Two

○ **2019**
JHSS Thandekkad
SSLC

Projects

○ **Exam Seating Arrangement—**
ExpressJS, NextJS, Sequelize, MySQL

I was involved in the creation of a web application that streamlines the seat allocation process for colleges, thus providing examinees with quick access to their assigned seats. Now that it's complete, we plan to incorporate this application into our college system.

○ *Wood Industry Management System-*
HTMl PHP MySQL

The objective of this project is to automate and optimize various business procedures, leading to increased productivity and efficient resource utilization in the wood industry. The proposed system boasts a user-friendly interface, facilitating seamless interaction and streamlined data administration.
